FOR IMMEDIATE RELEASE

Cummins Facility Services Receives 2026 Leadership in Sustainability Award from ISSA and Green2Sustainable

Recognition celebrates CFS's commitment to advancing sustainable practices, innovation and environmental responsibility across the global cleaning industry.

MARION, Ohio, November 24, 2026 — Cummins Facility Services (CFS), a nationally recognized, women-owned facility services provider, has been named a recipient of the 2026 Leadership in Sustainability Award, presented by ISSA, The Association for Cleaning and Facility Solutions, and Green2Sustainable. The award was presented on November 17 at ISSA Show North America 2026 in Las Vegas.

The award recognizes organizations that help bring sustainable practices to the cleaning and facility solutions industries worldwide, including through participation in ISSA's Sustainability Reporting Platform and service on ISSA's Sustainability Committee.

"At Cummins Facility Services, we believe sustainability is good business. It is about making intentional decisions that benefit our clients, our employees, our communities and the environment," said Jill Frey, President and CEO of Cummins Facility Services. "We are incredibly honored to receive this recognition and grateful for the opportunity to collaborate with industry leaders who share our commitment to driving meaningful change. Together, we have an opportunity to elevate our industry and create a more sustainable future."

CFS continues to advance sustainability through the integration of innovative technologies, data-driven decision-making, smart cleaning equipment, employee education and responsible cleaning practices. By aligning operational efficiency with environmental stewardship, CFS is committed to delivering solutions that support its clients' sustainability objectives while promoting healthier, safer and more efficient facilities.

"The organizations and individuals we're honoring have done more than talk about sustainability. They have rolled up their sleeves, shared what they've learned and helped move the entire industry forward," said Jon Adkins, ISSA Executive Vice President and co-chair of the ISSA Sustainability Committee.

The global cleaning industry reaches nearly every workplace, school, hospital and public space. Its extensive reach creates a significant opportunity to positively impact human health, employee well-being and the environment.

"Sustainability in cleaning is built by companies willing to lead before it's required," said Stephen Ashkin, CEO of Green2Sustainable and co-chair of the ISSA Sustainability Committee. "Cummins Facility Services has shown what that leadership looks like, and its work is helping set a practical standard for the rest of the industry."

This recognition reinforces CFS's commitment to continuous improvement, industry collaboration and the advancement of sustainable facility solutions. Through innovation, education and responsible business practices, CFS remains dedicated to creating lasting value for its clients, employees and the communities it serves.

About Cummins Facility Services

Founded in 1972 and headquartered in Marion, Ohio, Cummins Facility Services (CFS) is a 100% women-owned, WBENC-certified national facility services provider.
